WA 6160, Australia

4:00pm- 9:00pm

AU \$1,300

Registration:

Leah@InjectAbilityInstitute.com

1 (844) 4 INJECT

## ADVANCED NEUROMODULATORS INNOVATION AND DESIGN FOR FULL FACE NEUROMODULATOR USE

This course will review upper face neuromodulator use, but will focus mostly on lower face- including areas such as the DAO, mentalis, lips, and platysmal bands. We will also introduce you to newer techniques such as the “Nefertiti Lift”, rhinomodulation, as well as a tightening and lifting technique referred to as InstaTox®. This emerging innovation produces an instant tightening of the face, jaw and neck as well as smoothing of pores and reduction of facial flushing, and sebum production. The technique can also be used to elevate the upper lid of the eye by retraction of the excess, lax skin.

*“Who wouldn’t want the beautiful, natural results of Botox, instantly? No one is offering that to their patients. It is a true differentiator.”*

Leslie Fletcher, RN Creator of InstaTox® technique

This is an excellent course to expand your current knowledge, and elevate your practice to the highest level, so you can offer your patients the latest cutting edge techniques. Includes a Training and Reference Manual as well as a stylized certificate.

*InjectAbility® Institute*

*Aesthetic Education on the Cutting Edge of Science*

The InjectAbility® Institute provides scientific and creative education as well as mentorship in aesthetics. We address all the crucial rolls of aesthetic professionals, including: evidenced based innovative techniques, timeless facial design, client centered patient relations, the latest scientific tools for non-surgical facial aesthetics and the art of creating facial harmony.

The InjectAbility® Institute founder, Leslie Fletcher, RN, MEP-C is an influential thought leader in the aesthetics community, holding the only medical patent for a dermal filler technique ever to be granted in the United States, The ArqueDerma Artistic Restoration Lift. Passionate about education, Fletcher has been crucial in spearheading more in depth educational possibilities for aesthetic professionals.
